ABOUT ME

I started out in architecture, but during a semester abroad program, I had the chance to take up a course in marketing. During the course, I learnt Figma and created mocks for an app to help connect student volunteers with the senior disabled community. This exercise sparked my interest in marketing and design, which helped me pursue an internship beyond architecture.

At my previous job, YKG Limited, I started by taking on design tasks and eventually took on marketing initiatives for the company. Since it was a small company, I got the opportunity to wear multiple hats. I worked closely with the sales team and learned how content and design decisions can affect clicks, enquiries, and sales. In the process, I used tools like Lovable and Framer to turn my ideas into concepts, which then got implemented.

Outside of work, I took a course in Claude Code to gain hands-on experience with AI. I also created mockups using Claude Design for a B2C product app- to help women design saree blouses using AI- as a personal initiative.

Given my learnings and interest in marketing and design, I believe I can quickly ramp up and add value.

PROFESSIONAL EXPERIENCE

YKG Ltd, Marketing Executive / Design Lead

05/2025 – 05/2026

Marketing Executive / Design Lead :

Chennai (remote)
/London (On-site)

I identified and suggested improvements to our marketing assets while working on their designs, was given responsibility for implementing those suggestions, and ended up taking on a broader marketing role.

- Owned copy and design for Google Ads landing pages and Meta creatives. Managed the company's Meta Ads platform. Designed HubSpot-optimised email campaign templates in Figma for marketing Emails sent to prospects.
- Owned copy across all our marketing assets. Updated website copy based on competitive research and direct input from architects and site engineers to improve clarity and engagement.
- Wrote copy variants and redesigned key landing pages and email templates for A/B tests to improve scroll depth and conversion rates. For instance, the primary CTA on this page [🔗](#) wasn't sticky, and the page was overall very text-heavy, so prospects weren't converting. I updated the CTA placement and broke down the text into consumable chunks.

- Implemented email marketing and lead gen campaigns when sales slowed down in 2025. As a traditional architecture firm, we weren't leveraging typical digital channels, and I helped implement them to improve lead generation. Outside of email marketing campaigns to prospects, I also implemented PR initiatives by partnering with e-zines for sponsored placement.
- Given the size of our team, I also filled design gaps and created illustrations and images for landing pages using tools like Procreate, Kling AI, MnML (AI Architecture design tool), and ChatGPT.
- Introduced AI tooling like MnML to the marketing team to increase output speed, which our clients loved. We helped customers visualise their projects faster, which moved projects through the pipeline more quickly.

Customer Engagement :

- Became the point of contact for clients during a period when we were short-staffed, and clients were unsure where their projects stood. One client's planning application was rejected, and he was losing trust, so I made his project the priority, gave him a clear action plan, and set weekly check-in calls. I was also upfront that some of it comes down to council policy, and laid out the risk so he could decide on a second round. By the end, he asked for me to be his only point of contact.
- Kept customers in the loop. Built trust with customers by checking in regularly even when things were on track.
- Coordinated with clients in person (London). When sales slowed, I suggested we run email marketing with tempting referral offers and open houses. I designed the open house campaign. During site visits, I addressed client concerns. I ensured I understood their needs and coordinated between the client, retailers, and partner companies. I set clear deadlines and kept supplier backups ready, so nothing left the client hanging.
- Fixed the handoff problem between client requests, calls, and retailer updates. Things would often slip, and I'd end up chasing different teams, so we made it a rule that everything runs through Asana. Since half the team was remote, I brought in Fathom AI so meeting notes and action plans drop into Asana automatically. That cut down the chasing a lot.

YKG Ltd, Design Intern (Part-Time | While at University)

- Supported design teams by converting architectural concepts into clear, visually engaging content for websites, marketing, and social media.
- Repurposed content created for specific clients to create new marketing collateral.

03/2025 – 05/2025
Chennai, India
(Remote)

Larsen & Toubro, Architectural Intern

Gained hands-on experience in real-world project workflows by supporting senior architects in design development and preparing client presentation materials to strengthen engagement and approvals

07/2024 – 12/2024
Chennai, India
